- The blue HEAT ON light and heating element cycle on and off to maintain the selected temperature.

60 Minute Countdown Timer Dial

- Once the timer dial is set, the red POWER light will illuminate to show the Air Fryer is powered on.
- To assure even cooking/browning, open the frying basket drawer halfway through the cooking time. Check, turn or vigorously shake foods in the frying basket.

IMPORTANT: When you pull the drawer out from the Air Fryer body, the red POWER light and the Air Fryer will turn OFF. The timer will continue to count down when the drawer is opened.

- Heating will resume when the drawer is replaced.
- One beep will sound when the set air frying time has reached 0. The Air Fryer will turn OFF automatically. Both the red POWER light and the blue HEAT ON light will turn off.

IMPORTANT: When all air frying is finished, turn both the temperature control dial and the timer dial to 0 (OFF). Unplug the Air Fryer when not in use.

Before Using for the First Time

Operating Instructions

WARNING! This unit should not be used to boil water.

NOTE: During first use, the Air Fryer may emit a slight odor. This is normal.

1. Place the Air Fryer on a flat, heat-resistant work area, close to an electrical outlet.
2. Firmly grasp the frying basket handle to open frying basket drawer; then remove the drawer from the machine and place on a flat, clean surface.
3. Place food into the frying basket. Do not overfill frying basket with food. To ensure proper cooking and air circulation, NEVER fill any frying basket more than 2/3 full. When air frying fresh vegetables, we do not recommend adding more than 3 cups of food to the frying basket.
4. Insert the assembled frying basket drawer into the front of the Air Fryer. Always make sure frying basket drawer is fully closed.
5. Plug cord in the wall outlet.
6. Select air frying temperature from 175°F to 400°F.
7. Turn timer dial to the desired air frying time plus 3 minutes for preheat if the Air Fryer is cold. The blue HEAT ON light and the red POWER light will illuminate; the Air Fryer will begin heating.

IMPORTANT: The Air Fryer will not heat if the timer dial has not been set.

WARNING: Air Fryer will not heat -- the red POWER light will remain off, until frying basket drawer is fully closed.

8. The blue HEAT ON light will turn off when set temperature is reached.
NOTE: During air frying, the blue HEAT ON light will cycle on and off as proper air frying temperature is maintained.
9. To assure even cooking/browning, open the basket drawer halfway through the cooking time and check. Lift frying basket from frying basket drawer in order to turn or shake foods in the frying basket. Once complete, return the frying basket into frying basket drawer. Adjust temperature if needed. The timer will continue to count down when the drawer is opened, but the Air Fryer will stop heating until the drawer is replaced.

CAUTION: Make sure the clear basket lock is in the locked position when shaking foods for the Air Fryer. To avoid damage to persons or personal property, do not press the basket release button while shaking the frying basket.

WARNING: Extreme caution must be used when handling the hot frying basket and drawer. Avoid escaping steam from the frying basket and the food.

CAUTION: Always use oven mitts when handling the hot air fryer basket.

CAUTION: Hot oil can collect at the base of the drawer. To avoid risk of burns or personal injury, or to avoid oil from contaminating air fried foods, always unlock and remove the frying basket from the drawer before emptying. NEVER turn the drawer upside down with the frying basket attached.

NOTE: The Air Fryer can be turned OFF at any time by turning the timer dial to 0.

10. One beep will sound when the set air frying time has expired. The Air Fryer will turn OFF automatically. Both the red POWER light and the blue HEAT ON light will turn off.
11. Shake the frying basket/drawer vigorously and check food for browning and doneness. If additional air frying is needed, adjust temperature if desired, and set timer for 5 minute increments until fully cooked.
12. Allow cooked food to rest for 5 to 10 seconds before removing basket drawer from Air Fryer or food from frying basket.
13. When air frying is finished, remove the drawer from the machine and place on a flat, heat resistant surface. Then remove frying basket from the drawer.
14. Shake air fried foods out onto serving area. Promptly return the frying basket to the drawer and lock into place. Continue with subsequent batches, if any.

15. When all air frying is completed, turn both the temperature control dial and the timer dial to 0 (OFF). Both the red POWER light and the blue HEAT ON light will turn off.
16. Unplug the Air Fryer when not in use.

Helpful Hints

1. Olive oil spray or vegetable oil works well for air frying.
2. Use your Air Fryer to cook pre-packaged foods with a fraction of the oil, in a fraction of the time! As a general rule, lower the recipe baking temperature by 50°F and reduce the cooking time by 30% to 50% depending on the food and amount.
3. Do not overfill frying basket with food. NEVER fill any frying basket more than 2/3 full. When air frying fresh vegetables, we do not recommend adding more than 3 cups of food to the frying basket.
4. **For best results**, some foods need to be shaken vigorously or turned over during the air fry time. Consult the Air Frying Chart following as a general guide.
5. To avoid excess smoke, when cooking naturally high fat foods, such as chicken wings or sausages, it may be necessary to empty fat from the frying basket drawer between batches.
6. Always pat food dry before cooking to encourage browning and avoid excess smoke.
7. Air fry small batches of freshly breaded foods. Press breading onto food to help it adhere. Arrange in frying basket so that food is not touching to allow air flow on all surfaces.
8. The Air Fryer can be used to reheat food. Set the temperature to 300°F for up to 10 minutes.

Air Frying Chart

WARNING! ALWAYS USE A MEAT THERMOMETER TO ENSURE THAT MEAT, POULTRY AND FISH ARE COOKED THOROUGHLY BEFORE EATING. The following chart is intended as a guide only. The quantity of food air fried at one time, the thickness or density of the food, and whether the food is fresh, thawed, or frozen may alter the total cooking time necessary.

1. To assure even cooking/browning, open the frying basket drawer halfway through the cooking time. Check, turn or vigorously shake foods in the frying basket. This chart lists average total air frying time, the time at which some action is required, and what action is to be taken for best results.
2. Remember, frying smaller batches will result in shorter cooking times and higher food quality. Adjust air frying temperatures and times as necessary to suit your taste.

IMPORTANT NOTE: Unless food is pre-packaged and pre-oiled, for browned and crispy results, all foods should be lightly oiled before air frying.

- Oil may be sprayed or brushed onto foods.
- Spray oils work well as oil is evenly distributed and smaller quantities of oil are needed.
- To ensure crispy results, make sure foods are dried before adding oil.
- Cut pieces smaller to create more surface area for crispier results.
- Blanching is a term that refers to pre-cooking foods at a lower temperature before the final air fry.
- Add 3 minutes to the AIR FRY TIME to allow the Air Fryer to preheat.
